Group Project: <u>Hotel booking system</u>   Week: <u>Nov. 19-24, 2018</u>
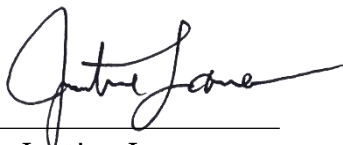

Task for the week:

- Created minor changes from the front-end,

  - 'images' Directory   : contains picture resources for the project
  - 'styles' Directory   : contains the `stylesheet.css` file for the project.
    - <u>`stylesheet.css`</u> : contains css styles for the html.
  - 'javascript' Directory : contains the javascript files for the project.
    - <u>`index.js`</u>   : contains javascripts for the logic of the html & sample json
  - 'pages Directory   : contains the template HTML files.
    - <u>`logon.html`</u>   : sample log-on page if user is not yet logged on.
    - <u>`home.html`</u>   : home page which consists of clickable items for reference.
    - <u>`ref.html`</u>   : sample landing page when a button from the menu is clicked.
    - <u>`rooms.html`</u>   : sample landing page when the button from the menu is clicked.
  - index.html   : redirects to the logon.html webpage.
- We distributed the workload to all members (see figure 2.1)

```
Documentation
  UML - Jolie & Cedric
  Documentation progresses - everyone
      *PS Make sure all are working

Functional Req
  App
    Backend - Christian & Hustino
    Frontend - Hustino
    Database - Jolie & Cedric
    Proxy - Christian

Git Management
  - all of us
  - make sure to
```
